

IBRAHIM ABU KHALED

Architect Designer & Architectural Draughtsman

Amman, Jordan | +962 78 706 1812 | ibrahimabukhaled97@gmail.com | linkedin.com/in/ibrahim-abukhaled97

PROFESSIONAL SUMMARY

Architectural engineer and draughtsman with experience in conceptual design and sustainable building design, contributing to large-scale residential, commercial, and institutional projects across Jordan, Saudi Arabia, and Iraq. Skilled in DD/SD-phase drawing production, BIM coordination, and multidisciplinary clash detection. Seeking an Architectural Designer position with a forward-thinking firm delivering innovative and sustainable architectural solutions.

CORE SKILLS

Software: AutoCAD, Revit, Rhinoceros, 3ds Max, SketchUp, V-Ray, Lumion, Twinmotion, Photoshop, Illustrator, InDesign, Premiere, Microsoft Word, Microsoft PowerPoint

Skills: Design Development (DD) and Schematic Design (SD) drawing production, BIM coordination and clash detection (Navisworks, BIM 360, Revit), area schedules and project specifications, dimensioning and annotation, signage and ceiling plans, family and component modeling, cross-department coordination

Languages: Arabic (native), English (fluent)

Soft Skills: Creativity, Communication, Management, Teamwork, Team Leadership

PROFESSIONAL EXPERIENCE

Arabtech Jardaneh (Aji) — Architectural Draughtsman

October 2023 – Present

Nuclear Hospital, Amman, Jordan (32,000 m²)

- Produced high-quality DD-phase drawings including dimensioning, annotation, ceiling plans, tiling, and signage plans
- Selected finishes and fittings according to applicable country regulations and supplier standards
- Modeled families and components
- Coordinated with other relevant departments
- Created schedules for project specifications and area calculations

IMC College, Saudi Arabia (70,000 m²)

- Produced high-quality SD- and DD-phase drawings including dimensioning, annotation, ceiling plans, tiling, and signage plans
- Selected finishes and fittings according to applicable country regulations and supplier standards
- Modeled families and components
- Coordinated with other relevant departments
- Created schedules for project specifications and area calculations

Al Sader, Al Sadder, Iraq (32,000 m²)

- Produced high-quality DD-phase drawings including dimensioning, annotation, ceiling plans, tiling, and signage plans

JEPCO, Amman, Jordan (2,000 m²)

- Produced high-quality DD-phase drawings including dimensioning, annotation, ceiling plans, tiling, and signage plans
- Selected finishes and fittings according to applicable country regulations and supplier standards
- Coordinated with other relevant departments
- Created schedules for project specifications and area calculations

King Abdullah Station, Amman, Jordan (20 km)

- Designed a bridge with a 20 km path and 20 transport stations, including 3D modeling and animation

Toyota Headquarters, Amman, Jordan (7,000 m²)

- Developed concept-stage design, plans, elevations, and sections
- Produced 2D and 3D modeling and rendering

Ayla Department, Aqaba, Jordan

- Produced high-quality DD-phase drawings including dimensioning, annotation, ceiling plans, tiling, and signage plans
- Selected finishes and fittings according to applicable country regulations and supplier standards
- Coordinated with other relevant departments
- Created schedules for project specifications and area calculations

OSUS EYE, Saudi Arabia

- Coordinated vertical shafts for HVAC, electrical, plumbing, and fire services
- Aligned shaft positions with architectural cores (stairs, elevators, service zones)
- Ensured sufficient clearance and access around shafts
- Synchronized building entries/exits with landscape pathways and plaza designs
- Ensured vehicular drop-offs, fire truck access, and service routes matched both disciplines
- Aligned ramp gradients and stairs between outdoor and indoor levels
- Coordinated Finished Floor Levels (FFL) with site grading and landscape slopes
- Avoided conflicts between entrance thresholds and site drainage slopes
- Used BIM clash detection tools (Navisworks, BIM 360, Revit) to run clash tests, categorizing hard clashes, soft clashes, and warnings
- Worked with the LEED team on sustainability certification requirements

Madaba Hospital, Jordan

- Coordinated vertical shafts for HVAC, electrical, plumbing, and fire services
- Aligned shaft positions with architectural cores (stairs, elevators, service zones)
- Ensured sufficient clearance and access around shafts
- Synchronized building entries/exits with landscape pathways and plaza designs
- Ensured vehicular drop-offs, fire truck access, and service routes matched both disciplines
- Aligned ramp gradients and stairs between outdoor and indoor levels
- Coordinated Finished Floor Levels (FFL) with site grading and landscape slopes
- Avoided conflicts between entrance thresholds and site drainage slopes
- Used BIM clash detection tools (Navisworks, BIM 360, Revit) to run clash tests, categorizing hard clashes, soft clashes, and warnings

INTERSHIPS

SPACES — Architects, Planners, Engineers

Principal Architect/Founder: Mahmoud Saymeh

- Participated in Al Harbbi Villa, Tabuk (Architecture, Landscape, BIM)
- Participated in Chemonics International Inc., Recycling-Banks (Research, Case Study, Function)

EDUCATION

Bachelor of Architecture — Jordan University of Science and Technology

2018 – 2023 | GPA: Excellent

Diploma of Engineering of Architecture — Faculty of Engineering Technology

2016 – 2018 | GPA: Very Good

Certificate of Professional Competence — Structural Iron Skilled Level

2015 – 2016

Certificate of Professional Competence — Rafters Carpenters Skilled Level

2015 – 2016

LEED Green Associate (LEED GA)

U.S. Green Building Council

AWARDS AND RECOGNITION

- Landscape | Middle East (March 2022) — cover story feature on the Jordanian city of Irbid
- JSRI – Jordan Space Research Initiative, Architecture Competition — Second Place, for designing space habitats addressing technology, safety, sustainability, habitability, reliability, efficiency, and comfort in extreme space environments
- The National Entrepreneurship Competition, Injaz Foundation Enterprise Business Challenge (EBC) — Third Place, Finalist Competition
- Toyota Headquarters Architecture Competition — Second Place, local design competition for a Toyota headquarters in Wadi Al-Seer
